

A bit about us...

- We reach over a billion people across the globe.
- We work with thousands of the world's leading companies across 49 countries.
- 50% of our employees are engineers.
- Data from trillions of monthly touchpoints.
- Over one trillion ad requests processed each month across our ad platforms.
- Mobile app data from over 2 billion devices.
- We reach more US millennials than Facebook.
- Nearly 70% of our audience is mobile.
- Yahoo! Finance is the #1 global finance site.
- HuffPost has 168M monthly visitors across 17 countries and is the most shared site on Facebook.
- Yahoo! Fantasy users spend over 30 billion minutes every year playing fantasy sports.
- Yahoo! Mail has 225 million monthly active users and is the highest-rated email client with 4.5 stars in the App Store and on Google Play.
- Tumblr users post 33M articles and videos every day. It would take the Washington Post, WSJ, NYT and BuzzFeed combined over 50 years to publish the same amount.
- VDMS delivers over one billion hours of video each year.

And now for the real alluring event:

We are happy to invite you to join us on our annual **Yahoo Research day** at the Technion. Come take part in two fascinating science tech talks, dynamic round tables with our research scientists and engineers and enjoy an interesting discussion regarding research directions, company's products and our currently open vacancies for full time or summer internship.

We will meet on **Monday, January 8, at 12:00, at Technion Taub Building, Room 337**

Program – Research Talk, Round Tables, Delightful Snacks and Surprises

12:00-12:15 - Intro by Dan Pelleg, Research Director and head of site at Yahoo Research.

12:15-12:40 – Oren Somekh, Sr. Research Scientist at Yahoo, will present a work entitled: "Item Cold-Start Handling in Collaborative Filtering Recommenders", which was co-authored with O. Anava (former Intern), D. Drachler-Cohen (former Intern), D. Cohen (former Intern), M. Aharon, N. Avigdor-Elgrabli, Y. Koren, and was presented in parts at RecSys'2015, WWW'2017 (Industrial Track), and RecSys'2017.

12:40-13:05 – Eshcar Hillel & Anastasia Braginsky, 2 Research Scientists at Yahoo, will present a paper entitled: "A Key-Value Map for Scalable Real-Time Analytics", which was co-authored with Dmitry Basin, Edward Bortnikov, Guy Golan Gueta, Idit Keidar, Moshe Sulamy and was presented at PPOPP conference a year ago.
